PROJECT:

The project, titled "**Hate Speech on Twitter: A Pragmatic Approach to Collect Hateful and Offensive Expressions and Perform Hate Speech Detection**," is a focused endeavor aimed at the development of a system that can accurately detect and categorize hate speech and offensive comments within Twitter posts. Built using Java technology, the project incorporates machine learning algorithms to achieve precise classification.

It also introduces user-friendly interface enhancements to improve the posting and interaction experience. This project, now completed, contributes to the creation of a more respectful and inclusive online environment, addressing the persistent issue of hate speech on social media. The skills demonstrated throughout the project include data analysis, Java programming, machine learning, and user experience design.
